

MONTHLY NEWSLETTER

Outdoor exploration during the last month

In April we had an amazing opportunity to go to the New Central Library, where we reinforce how to behave properly in public spaces and respect our environment. We also had the fortune to use public transportation as a group and, we learned through our own experiences about safe outdoor rules. We are also having a lot of fun playing in our outdoor spaces. Remember that your child needs to come prepared for any weather with appropriate clothing!

What to expect this Month?

The month of May is coming with so much fun and excitement!

We are going to learn about the life cycle of Bugs and insects. The children are already expressing interest in bugs and insects and how the bugs and insects help our environment. This month we are going to have the opportunity to observe real Larvae's in our classroom and, learn about the butterfly's life cycle. We are also having a special guest in our classroom this month to learn about Bees. An Apiculturist named Robert is going to teach us all about this subject, and we are very excited to have him, so we can learn how to take care of this very important insect!

We are also preparing a Special event to celebrate Mother's Day! Which is where the children are going to sing a song and spend time with their family members, doing different crafts and, enjoying a potluck.

At the end of the month, we are going to have a Bike day at school, a jersey day and lastly a crazy hair day!

Have an Amazing month!

During this Month
"Insects and Bugs"

"Mother's Day
Celebration"

"Bike day in the
preschool"
